Fisher Named to Rutgers Poultry Research Staff

Dr. Hans Fisher has been named a poultry research staff member at Rutgers University, New Brunswick, N. J., Dr. William H. Martin, dean of agriculture, has announced. Dr. Fisher is the first nutritionist in its poultry department, the university said.

Dr. Fisher holds three degrees. He received his bachelor of science degree from Rutgers in 1950, his master of science from the University of Connecticut in 1952, and his doctor of philosophy from the University of Illinois this year, where he also received a Purina research fellowship.

Arkansas Farm Statistics Show Record Production

A record production of crops, cattle, and broilers last year has been reported for Arkansas by its state crop reporting service, although the season was said to be relatively unfavorable in climate. Income was reported down slightly from 1952.

Crop production was 5.7 per cent more than the 1952 volume, and 2.7 per cent more than the 1942-51 average, the service said. Record yields were reported for oats, wheat, and barley, and above average yields on cotton and rice, however, corn acreage was reported the smallest harvested since 1867, and soybean production only half of the 1952 figure.

A six per cent beef cattle and a five per cent dairy cattle gain was reported for 1953 compared to a year earlier. A record total of 74 million broilers was produced in Arkansas in 1953, the service said.

NEW ALLIED MANAGER

New manager of the marketing research department of Barrett division, Allied Chemical & Dye Corp., New York City, is James E. Sayre, the firm has disclosed. Mr. Sayre, an economist, has published several of his studies.
